-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

*Detailed Action*

This is the first Office Action corresponding to original filing. The application contains 6 claims.

*Information Disclosure Statement*

Receipt is acknowledged of Information Disclosure Statements, which has been reviewed by the Examiner.

*Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

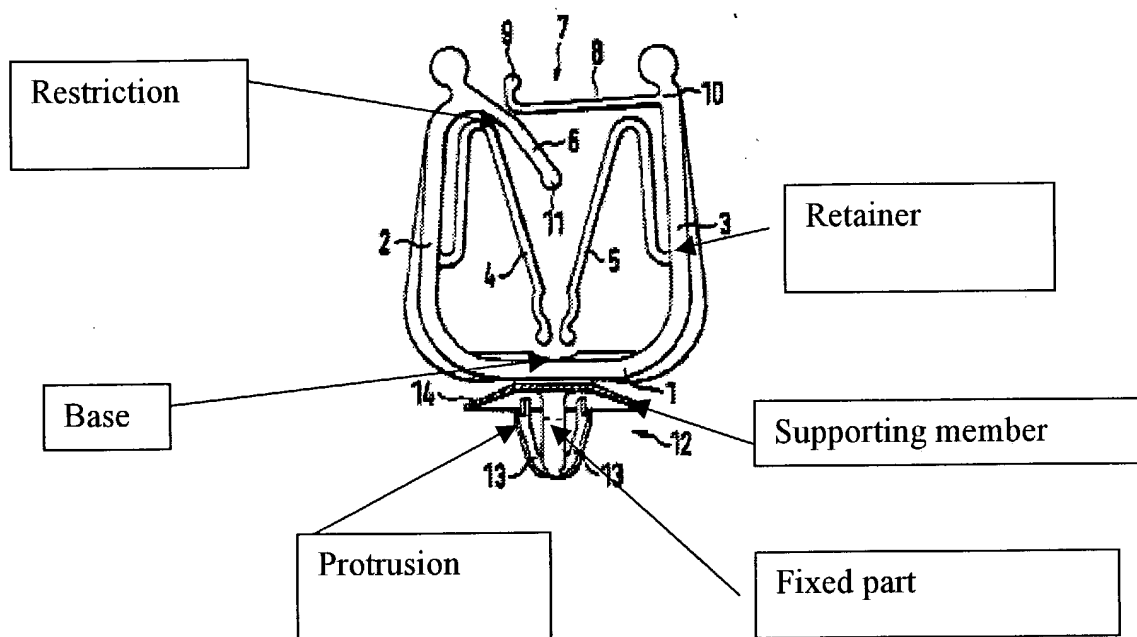

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Jüemann et al. (Pat No 4,917,340).

The patent to Jüemann et al. shows a wire retainer comprising supporting member having a fixed part, a retainer member having a base fixed to a central (top) part of the supporting member, and extended upward to retain a wire, a restriction part and a protrusion. Please refer to the figure below.

Art Unit: 3632

*Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Jüemann et al. in view of Bendorf et al. (Pat No 6,123,580).

The patent to Bendorf et al. shows the teaching of soldering for securing a clip on a surface.

It would have been obvious to one skilled in the art at the time the invention was made to have secured the device shown by Jüemann et al. by soldering as taught to be old by Bendorf et al. to better secure the wire retainer.

Art Unit: 3632

*Allowable Subject Matter*

Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The following is a statement of reasons for the indication of allowable subject matter: none of the art of record discloses a wire retainer as the one recited in claim 1 wherein the supporting member has an upper portion positioned above the part where the retaining member is fixed it.

*Conclusion*

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Barnett (4,564,163), Andre (4,614,321), Ohnuki (6,371,419) and Akizuki (6,669,149) show other clip of interest.
